

E-Commerce Market

Index Page:

Register:

Register a Person:

The screenshot displays the 'Register Person' form within the E-Commerce Market interface. The form is titled 'Register Person' with a subtitle 'Create a base identity record. Then assign the person as a Customer or Vendor.' It includes input fields for 'FIRST NAME:', 'LAST NAME:', 'EMAIL ADDRESS:', and 'ADDRESS:'. A blue button labeled '+ Register Person' is positioned at the bottom of the form. The background shows a navigation bar with 'Person', 'Customer', and 'Vendor' tabs, with 'Person' currently selected.

When registering, we first register a person to get all the necessary details.

Register a Customer:

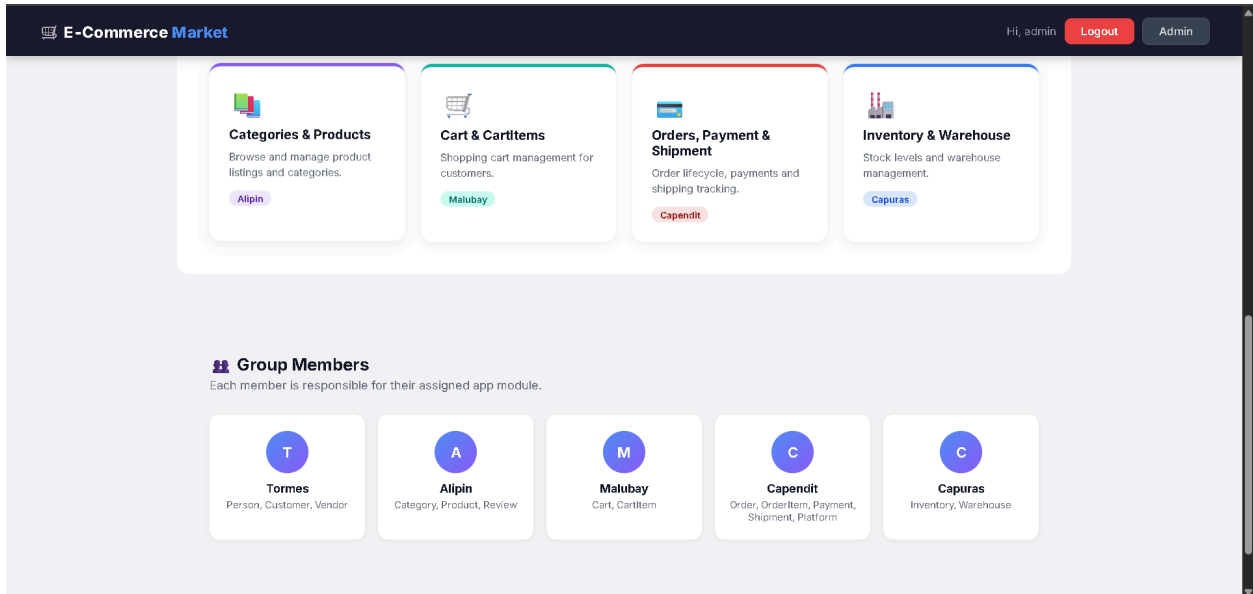

The screenshot shows the 'Register Customer' form in the E-Commerce Market application. The top navigation bar has 'Person', 'Customer' (highlighted), and 'Vendor' tabs. The form title is 'Register Customer' with a subtitle: 'Assign an existing Person as a Customer. A person can only hold one role.' A warning message states: 'A Person can only be a Customer or a Vendor — not both. Don't see the person? Register them first.' Below this is a 'SELECT PERSON:' dropdown menu. The dropdown is open, showing a list of people. The first person is 'Sample1 Sample1 (sample1@gmail.com)' and is highlighted with a green background. The form is set against a light green background.

When a person already has a record, we can now choose to register that person as a customer if that person is a customer.

Register a Vendor:

The screenshot shows the 'Register Vendor' form in the E-Commerce Market application. The top navigation bar has 'Person', 'Customer', and 'Vendor' (highlighted) tabs. The form title is 'Register Vendor' with a subtitle: 'Assign an existing Person as a Vendor and set up their store. A person can only hold one role.' A warning message states: 'A Person can only be a Vendor or a Customer — not both. Don't see the person? Register them first.' Below this is a 'SELECT PERSON:' dropdown menu. The dropdown is open, showing a list of people. The first person is 'Sample1 Sample1 (sample1@gmail.com)' and is highlighted with a light blue background. Below the dropdown is a 'STORE NAME:' text input field with the value 'sample store'. At the bottom is an orange button labeled '✓ Register as Vendor'. The form is set against a light orange background.

Conversely, we can now choose to register that person as a vendor if that person is a vendor.
